Oculus Pathology

Fast and Reliable Pathology Services Designed for Modern Imaging Centers

With the ability to deliver results in as little as 24 hours across nearly every pathology specialty and subspecialty, Oculus Pathology is the ideal partner for today's imaging centers.

From breast biopsies to lymph node biopsies and FNAs, Oculus Pathology delivers accurate results quickly and with a level of personal service only a physician-owned pathology practice can achieve.

The Oculus Pathology Difference

- Easy access to Oculus' deep bench of pathology specialists and subspecialists for fast, personalized consultation
- Competitive turnaround times averaging 1-2 days
- Diagnoses for complex and rare cases
- Full integration with native EMR
- Nearly 200 available tests performed in-house

The Oculus Pathology labs employ the latest advances in digital pathology to deliver:

- Telepathology solutions built for modern practices
- Multiple high-capacity scanners with 240-slide capacity
- Versatility to read LBC, FFPE, and smear-based slides
- Workflow integration for fast tele-reporting
