

HEAD AND NECK PATHOLOGY SERVICES

For otolaryngological practices, a trusted and reliable pathology partner with subspecialty expertise is essential. Clinical Pathology Associates shares your goals of delivering excellent patient care and clinically appropriate, judicious testing.

The Clinical Pathology Associates Difference

Our board-certified pathologists offer expert diagnostic and consultative expertise in all areas of head and neck pathology including malignant and premalignant lesions of the oropharynx and larynx, salivary gland pathology, parathyroid gland pathology, and thyroid gland pathology.

Our cytopathologists have extensive experience and expertise with respect to fine needle aspiration cytology of the thyroid, parathyroid, and salivary glands. The service is supported by state-of-the-art immunohistochemical and molecular testing for diagnosis and prognostic markers, many of which are performed routinely in accordance with the most recent American Society of Clinical Oncology and National Comprehensive Cancer Network recommendations.

How We Serve You
